Advanced Studies of the Human Aura #1

© Tom Miller

The Creation of the Cosmos

Beloved Students of Higher Truth,

In the eternal light of divine joy I am here to share with you for the next six weeks a series of teachings on advanced studies of the human aura. This series complements and completes the triune teaching on this subject as released previously by my holy brothers, the Ascended Masters Kuthumi and Djwal Kul. Each of them has eloquently discoursed with students of higher truth about the aura from many angles of awareness. Each has given specific keys and techniques for purifying, strengthening and expanding the aura. My purpose is to release to you an additional perspective that will benefit your spiritual path when received with an open heart and mind and put into play in your life through direct and focused practice and action.

The Creation of the Cosmos *continued...*

Beloved heartfriends of old, I have communed
with my gurus in preparation for this series,
namely the Elohim Hercules,
the Lord Himalaya and...

The Creation of the Cosmos *continued...*

...the Great Divine Director—masters of such holy radiance and divine eloquence as can barely be fathomed by the minds of mortal mankind. And yet I will attempt to convey their higher wisdom in words that I trust will edify and uplift, codifying their buddhic mindfulness in thoughtforms, imagery and heartstreams that will surely bring you more than a twinkle of mirth as together we engage in a new sacred adventure of Self-discovery.

© Tom Miller

The Creation of the Cosmos *continued...*

My purpose is also to help you refine your auras within the great crystal stream of light that is ever available to you from your Source through a direct and personal experience that I would classify as a cosmic darshan. For I will hold a flowfield of divine love, wisdom and power around each one who reads and studies this instruction so that you may more easily rise into the crystalline patterns of perfection that will whirl and swirl through your auras as your Higher Self opens the portal of your heart-mind connection to our realm. Here you will feel the scintillating frequencies of those celestial beings whose auras are vast and clear and who offer their attainment and gnosis to each aspiring adept.

The Creation of the Cosmos *continued...*

As I begin this instruction, I urge you to take a few minutes before you read or listen to the worded releases to meditate in deep silence upon the beautiful aura of the Great Central Sun. Within the multidimensional spheres of this cosmic atmosphere of light in all of its wondrous gradations and holy essences you will find a portion of your own Selfhood and divine design. From this sacred space of love-wisdom the teaching I present will already be known within you, for even as I access its verity and virya, so you, too, will know its glory and innate value for your soul.

The Creation of the Cosmos *continued...*

“In the beginning God created the heaven and the earth. And the earth was without form, and void, and darkness was upon the face of the deep.” So begins the book of Genesis of the Holy Bible. At this point of the Cosmo-Creation neither the “heaven” nor the “earth” shone with light or the radiance of what would manifest as the aura of the All. Into the darkness of the Mother void, the womb of cosmos, the Father impregnated the seed ideation of all that would manifest unto the eternal cycles of beingness in all universes. Yet until this seed took root and began to manifest as the spiritual and material dimensions of “the heaven” and “the earth” no auric light energies proceeded from them. Once the creation emerged from the cosmic void as life, this living energy field, as a specific divine radiance, expressed itself as the emanation of the vast cosmic aura.

The Creation of the Cosmos *continued...*

This original creation was the Mindful thought of the Creator and all subsequent thoughts or ideations of created beings are reflections of this first cause or causal thought process of God. Thought is a ray of divine intelligence focused upon a specific purpose. Once it is released from the mind of its creator it is fulfilled and manifest according to the intensity (power and love geometrized) of its conception. Thus, all creativity issuing from the Divine One and his co-creative offspring have the impulses of divine wisdom, power and love embedded within it.

The Creation of the Cosmos *continued...*

When the disciple accepts the responsibility to be a co-creator with God in its totality, he or she enters into divine levels of beingness that are reflective of what the Elohim, the creators of the worlds upon which we evolve, know and experience. This understanding is cognized by all celestial beings, ascended masters and spiritual Sons and Daughters of God who have entered into oneness with the Creator through acceptance of their full divinity through the Law of Correspondence. This law allows for completeness and unity to occur because one's aura is entrained with the aura of the whole through surrender to the One Will, the First Cause.

The Creation of the Cosmos *continued...*

In the process of entering into this higher relationship of beingness in the Presence of God, the human aura becomes the divine aura. It is literally replaced with a new, solar radiance that is accommodated through the keying into a higher flowfield of light that is God's great cosmic aura. The entire warp and woof of creation is God's endowment of himself to his offspring. And the energy field of perfect beingness as the light of akashic resonance may be entered into, felt and accepted by every created and conscious being through the free will experience of identification with and acceptance of this divine radiance of God's eternal beingness.

The Creation of the Cosmos *continued...*

For every adept who understands the cyclings of the Eternal's inbreath (unmanifest beingness within the cosmic void) and outbreath (manifest beingness within the comic ovoid or egg) co-creation is easy, natural and joyful. The co-creative life is the only true life for those who are one with God, for God is continuously re-creating the cosmos each moment within the Eternal Now. This is Elohimic living, even if the co-creative thoughts or ideations are seemingly manifest on less than a galactic or cosmic scale. In reality, all true co-creative work consecrated to the Divine One affects the entire cosmic web of life—at microcosmic and macrocosmic levels of life.

The Creation of the Cosmos *continued...*

This new sense of divine responsibility and authority to create may seem both daunting and awesome to the initiate who is just beginning to enter into advanced levels of alchemical experimentation with the holy currents of love, wisdom and power. Yet each one is gently guided by the higher gurus and teachers of the divine sciences, those silent watchers and guardian spirits who hold the field of beingness and picture-perfect Presence on a vast scale beyond the imagination of most of humanity.

The Creation of the Cosmos *continued...*

For you who have purified, strengthened and expanded your auras through the daily devotions of meditation, prayer and various yogic exercises and practices, I have prepared a series of inner alchemical experiments to assist in raising the levels of your auric brilliance, reflective of your higher beingness. This will allow your creative work to be endowed with a greater divine harmony and luster, a greater spiritual radiance and grace. Some of these I will reveal to you in your finer body as you sleep at night during the six weeks of this course. Others I will share through the teachings that I will present outwardly. One and all, they will bring you the joy of buoyancy in God's Presence as you consider your human aura as now melding and morphing into something more sublime and divine each day.

The Creation of the Cosmos *continued...*

I am abiding at your side as you receive and assimilate the new cosmic impulses of auric light and solar heat from your Source.

Lovingly yours, El Morya.

The Creation of Man

Forerunners of the New I AM Race,

To fully read, interpret and discern the intricacies of the ever-changing flowfield of the human aura one must first understand the nature of Man as a being of light. The creation of Man as man and woman, male and female, in the image and likeness of the Father-Mother God was an epic event within the ageless eons of cosmic time. Most men interpret from various scriptures that this process occurred almost instantaneously. However if you consider the miraculous nature of the structure and workings of man's physical body—of the various systems, organs, tissues and cells—and of how they operate as a synchronistic and integrative whole with a level of perfection that even the most enlightened of human beings cannot duplicate within their own laboratories, you will realize that the creation of man and woman occurred through a process similar to your gestation within the womb.

The Creation of Man *continued...*

In truth, Man was created by the Elohim in the image and likeness of their own solar beings, who in turn were created in the image and likeness of solar systems, galaxies and universes untold, which were created in the image and likeness of the One. The gestation process of Man within the mind of Elohim may be likened to the great inbreath during which, through divine meditation, they cognized every aspect of Man's being. The original creation of Man was at a much more refined level of beingness than what you observe today in your flesh bodies. Man was a spirit with an ethereal light body who lived at a frequency that would be invisible to your physical eyes today.

The Creation of Man *continued...*

The aura of the manus of each lifewave that have incarnated upon Earth is expansive and indicative of the divine prototype that all Sons and Daughters of God were destined to outpicture in their free will life experience. And the original auras of each created man and woman shone with a divine clarity and crystalline sparkle that would dazzle you today. Truly all were *gods* in the highest sense, fully connected to their Source through the great heart-tie of conscious awareness of their innate divine nature.

The Creation of Man *continued...*

It was only because of the fall of Man, his descent into the lower matter planes, that mankind's life essence solidified into more dense bodies. These were clothed in the various veils of energy that you now call your four lower bodies. Your original, pristine aura remains inviolate within your Higher Self, your Solar Presence. Yet your human aura is a repository of the electronic essence of your cyclic experiences in time and space through all your incarnations in the world of form. As you know, this energy field speaks more clearly of who you really are in all domains of being than your physical appearance.

The Creation of Man *continued...*

For Man to fully align his human aura with the starry light body that still vibrates above (or within) him, he must first recognize his divine origin and live again as a god-being. He must understand that within the original creation of his true being as written in Genesis he is evolving from the seed ideation of Elohim and never lose sight of this fact and of what it bodes in his divine destiny.

The Creation of Man *continued...*

Evolutionary scientists of today look primarily at the physical, emotional and mental makeup of Man, ignoring his primary essence as a spiritual being. Although they may recognize that Man is developing more acute and even intuitive mental faculties the missing link of their understanding of Man's true nature has itself woven a veil of darkness to obscure his pristine origin. Thus, the majority of the scientific thought of today ignores the subtle nature of Man, his aura and his higher electronic bodies.

The Creation of Man *continued...*

It is true that in ages past after the fall of Man the genetic material of certain life forms were mixed with that of various animals loosely resembling your bodies and that a new type of hu-man now known as homo sapiens came into being. And it is therefore logical that from this perspective man in his current physical state evolved from the ape. Yet this does not erase the truth known for eons within the mystical teachings of the ages that Man was created and is not simply the result of a hypothetical evolutionary process.

The Creation of Man *continued...*

Man must look to God for his inspiration, his light and his pure beingness. When he ignores the Creator and looks upon himself only as a byproduct of animal procreation he

loses all sense of his infinite capacity to co-create as a true Son or Daughter of God. Studying the human aura from the context of what is possible and taking into account what the auras of the ascended masters, angelic choirs and cosmic beings look like, he can begin to equate with the higher worlds and develop his aura as God intended.

The Creation of Man *continued...*

Man is being recreated day by day through his collective thought processes, the influences of his environment and by the activity of his consciousness as he experiences life. There is a wide range of levels of awareness among men and women of today—some living more as animal than as Man and others living fully within their higher, Buddhist Nature. The earth is composed of a multitude of souls of various root races and evolutionary paths, yet all come from the same Source. Though most have lost their moorings in seeking to attain to the divine ideal of beings Sons and Daughters of God fully clothed in light as free spirits of the cosmos, the few maintain the connection with a higher reality that sustains the opportunity for all to evolve to their true estate.

The Creation of Man *continued...*

As you attune to your pristine origin in the eye of God and visualize yourself living within his image and likeness, your aura is gently suffused with the more subtle qualities of his holiness, grace and love. The simple act of seeking to enter into this more refined level of living brings heaven's muses to your side. Desire to live as God-free beings live who have progressed beyond the rounds of karma and rebirth sets into motion a dynamic process whereby an added layer of spiritual protection is yours, drawn into your being by that pure desire.

The Creation of Man *continued...*

God desires for Man to explore his creation and to expand his awareness of all that has been seen as good. Through what could be called this vicarious cooperative experience, the beingness of God is impressed more deeply into the matter planes and Man then brings the essence of beingness back to God as he reunites with him. From this perspective, the initiates of today have learned to put aside a focus on duality and live in the unity of God's beingness, of God's great aura of Presence.

Life is sweet for those who accept it through the joy of the Spirit's work within!

I am Morya, leading the way for a more fruitful life for disciples of truth.

The Aura of the Great Central Sun

Fragrant Ones whose Auras are Charged with
Solar Light,

The advancement of the race requires a closer and
more intimate identification and communion with God.
As you have witnessed with your inner sight the creation
of the cosmos and the creation of Man, I would
discourse on the importance of the aura
of the Great Central Sun.

The Aura of the Great Central Sun

Continued...

It is easier for Man to identify with God when he first looks to the sun of his own system as an example of a most selfless life-giving being whose radiance sustains all life on his world. What Man may also understand is how each of the nearly infinite numbers of suns within the billions of galaxies within the universe receive their life-sustaining frequencies from a greater being of light who is the Great Central Sun. This being is the closest symbol of what you can ideate or equate with as God, the Creator, the Source.

The Aura of the Great Central Sun

Continued...

The aura of the Great Central Sun actually permeates the entire cosmic egg, though your science of today has not developed refined enough instruments to register or to measure the subtle energies emitted by it. Every created sun within all galaxies and solar systems is an offspring of the Great Central Sun and is nourished by its light, its love, its divine glory. And you, as a solar being in your essence, also receive a stepped-down level of the creative fires of God's being, which sustains your life as a spirit.

The Aura of the Great Central Sun

Continued...

When Man identifies with God's great energy field, his cosmic aura, and begins to accept the greater impulses of its original frequencies of solar love, he may more easily evolve through the natural processes of life to become a solar being himself. For although all have a Higher Self, through a continual closer identification and acceptance of the beingness of God's light within his own domain, Man merges into that solar essence more completely.

The Aura of the Great Central Sun

Continued...

The aura of the Great Central Sun contains all of the life-giving frequencies that sustain all created life at all levels of awareness—from the tiniest microorganism to the most massive of suns and galaxies. Through divine intelligence, the Great Central Sun is able to feed the specific frequencies required by each created being that are essential to its life, regulating what is able to be received and assimilated by that one. The great suns at the center of the various solar systems receive a much more powerful conveyance of divine light-food in comparison with what the tiny creatures that exist deep within your earth are able to feed on.

The Aura of the Great Central Sun

Continued...

Man in his true nature can live directly on the solar emanations from the sun of Helios and Vesta without any other external food source. For the sun as a great father-mother is constantly feeding the beings of their children with their life-giving essences. As some of you have discovered, when you refine your lives and learn the science of solar gazing you will be amazed to realize that the cells of your being can actually be nourished more by the pure, divine food of the sun's rays than what the dieticians of today teach. The lost science of solar living is coming to the fore and all will understand this dynamic and experience it in the Golden-Crystal Age of Aquarius.

The Aura of the Great Central Sun

Continued...

What some have seen around the saints of East and West as a halo of light is the effect of their devotions and meditations wherein they were able to sustain a greater auric radiance around themselves by their oneness with God.

In some cases, documentation exists that prove that these saints lived on either no or very little physical food. Their beings were literally charged with the auric light of their spiritual mentors and gurus who in turn were sustained by the energies of higher worlds through solar or light breathing.

The Aura of the Great Central Sun

Continued...

In addition to being a cosmic emitter of light, the aura of the Great Central Sun also receives the impressions of all life evolving throughout the cosmic egg. The interplay of the emanations of Man's awareness upon this aura is actually the recording of all that occurs upon the akashic field, which is a very subtle layer of God's great aura. Thus you may understand how an action in your environment effects life throughout the cosmic web. Jesus said, "Inasmuch as *ye* did it to one of the *least* of these *my brethren*, *ye* did it to *me*."¹ He understood his connection with his Source and of how he was able to feel the akashic effects of all people's deeds because of his oneness with God's aura.

The Aura of the Great Central Sun

Continued...

To conceptualize your oneness with God, begin to meditate upon the great pulsating aura of his Presence throughout the cosmic egg and feel the subtle gradations of the light of love that is ever available to you as a son or daughter of God. Visualize a blazing sun before you and then allow it to engulf your aura with its light, warmth and nourishing energies. Accept that this is your true spiritual food that is rejuvenating your spirit, your mind, your emotional body and your physical cells with its radiance. Breathe in deeply the rays of light and allow them to penetrate you as you have felt the rays of the sun on a summer day warm your epidermis and then travel through all of the inner layers of your skin.

The Aura of the Great Central Sun

Continued...

Now see this sun fully manifesting itself within your heart chakra until it expands to fill your chest cavity. Next see the same solar radiance at the center of each of your chakras, gently radiating out their life-giving energies throughout your entire aura. Feel your aura at an energetic level as one with your Solar Source and your God Presence in turn one with the Sun of Helios and Vesta.

See the merging of all of these “Selves” into the One Presence of the Great Central Sun while you continue gently yet deeply breathing in and out, in and out.

The Aura of the Great Central Sun

Continued...

Then say out loud with great joy as you continue to visualize this solar radiance:

I AM One, I AM One, I AM One with the Sun.
I AM One, I AM One, with the Great Central Sun.

God is here in my heart. I AM One with God's heart.
Light expand through my heart. Love expand through my heart.

Let my aura be thine. Let my aura now shine.
O, my God, I AM thine! I AM truly divine!

We are One, we are One, we are One, we are One.
We are One, we are One, in the Great Central Sun.

The Aura of the Great Central Sun

Continued...

As your aura merges with the light of the Great Central Sun you can create a more permanent connection with God's being that will allow you to live a life of joy, levity and creativity. From within this auric field every alchemical experiment, every conscious project, every dream and vision of a new reality for your world may more easily manifest and come to fruition. I recommend that you engage daily in this short ritual during the duration of our course in the Advanced Studies of the Human Aura, for it will also afford you a greater receptivity to the divine concepts that I will be sharing in my forthcoming releases.

I am yours in the fulfillment of your highest potential as a Solar Being,

El Morya
