Advanced Studies of the Human Aura #10

The Sacred Flowfield

Heartfriends Whose Fealty to the Divine One is Diamond-Strong,

Your human aura is an electronic garment of light that surrounds your core identity as a soul evolving within time and space. It is reflective of the greater divine aura that surrounds your core identity beyond time and space as a solar being within the perfected realms of pure beingness in God.

Within this higher domain your aura is a sacred flowfield of brilliant, white light. It may also be so where you abide now by your conscious choice.

The Sacred Flowfield *Continued...*

I aver
that the word
flowfield
is a more
accurate
description
of what is
observable
as the ever-
changing
oval body of
energy that
is your aura.

The Sacred Flowfield *Continued...*

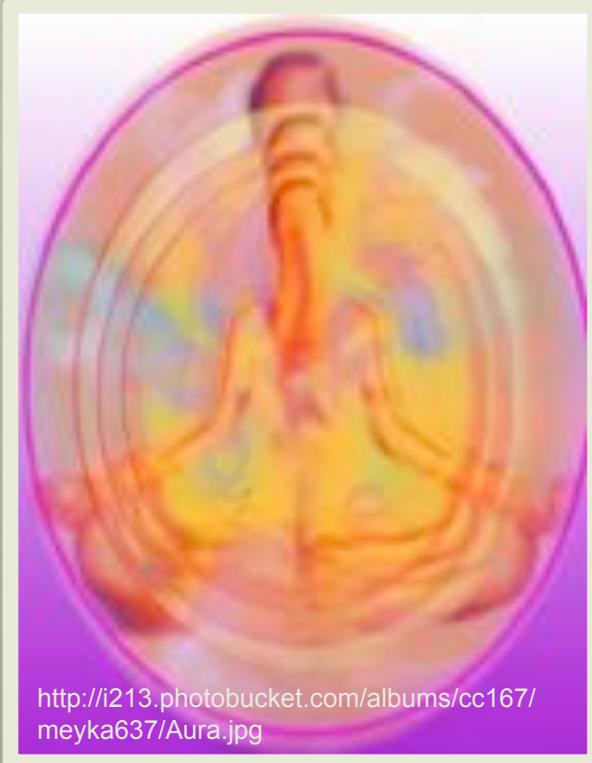

<http://i123.photobucket.com/albums/o288/trezise1975/aura.jpg>

For although at a given point of time the aura may be photographed and studied, from a perspective of elapsed time the flowing nature of the aura is seen as you engage in activities and as thoughts, feelings and memories move through your consciousness. All divine teachers take this dynamic into account when working with their students in order to discern how best to assist them in mastering the art of living and the science of being while perfecting their human aura.

The Sacred Flowfield *Continued...*

When lovingly engaged in the true initiatic arts and sciences which allow the divine light free concourse within and through one's life, the aura is sanctified with holiness and becomes a sacred flowfield. During this time the aura of the

spiritual aspirant may be seen as an oval of effulgent light that is gently suffused throughout the greater circumference of one's immediate environment. While engaging in world service through a collective effort with other heartfriends, a group flowfield is established that is much more powerful in its potential effects for God-good for all life.

The Sacred Flowfield *Continued...*

Every time you make a connection with another individual, there is an energetic blending of certain of your auric patterns. In the case of most people who are oblivious to the effects of their thoughts and feelings upon life, there is a dulling of the coloration of their auras when these interactions occur solely from the human level.

However, when individuals who are consciously aware of their Source commingle and communicate while engaged in sacred work, a distinct and observable increase in the brilliance and expansiveness of each one's aura may be seen.

The Sacred Flowfield *Continued...*

To maintain an effulgent, rainbow-colored aura one must first enter into the space of being where all life is felt and embraced as sacred. Each moment may be experienced as an opportunity for Self-discovery and Self-fulfillment within the greater glory of God's divine flowfield—the natural world.

The Sacred Flowfield *Continued...*

As one's single-eyed vision of the unity of all life is mastered and as all past karmic encumbrances are transmuted through joyfully employing the seven rays in harmonic living, the flowfield of your aura is purified, rarefied and glorified in God's crystal stream of beingness.

<http://i649.photobucket.com/albums/uu212/comemaiz/cuadro.jpg>

The Sacred Flowfield *Continued...*

By your conscious application of the use of the spiritual technologies replete within the sciences of the spoken word in the giving of mantras, chants, prayers and decrees and by an increased melodic resonance that may be experienced during the singing of devotional songs, your aura may become charged and recharged with solar fire and light. Many of you have felt the deeper impact upon your beings that has also manifest as a fine-tuning of your auric field while you've been engaged in these practices.

<http://i638.photobucket.com/albums/uu105/crystalgazer01/BEAUTY/violin-1.jpg>

The Sacred Flowfield *Continued...*

These have also been causative of a gradual increase in your ability to feel, to retain and to expand the radiance of your sacred flowfield that in turn has increased the circumference and volume of your causal body.

The Sacred Flowfield *Continued...*

The sacred flowfield of the halos of the saints and sages interpenetrates multiple dimensions of being. All auric emanations directly impact the akashic field—the subtle world of ether—for they leave their impressions, their recordings in most accurate detail. Your personal book of life is being written continuously by your soul as its renderings of consciousness by your free will choice are manifesting moment by moment. By your own thoughts, words and deeds you will be self-judged within the framework of the lesson plan laid out by your soul before your incarnation in consultation with the masters of divine jurisprudence who lovingly guide your evolutionary journey.

The Sacred Flowfield *Continued...*

To master the sacred flowfield of your aura, begin always by focusing on the light of God within your heart and by breathing in the divine frequencies of your God Presence that are ever flowing to you through your crystal cord.

The Sacred Flowfield *Continued...*

Even a few minutes a day of silent meditation, visualization and communion with your Solar Source will reap great treasures as the spiritualization of your consciousness and the purifying of your aura. Moving on from this basic practice to the higher, intentional

yogas, full union with God will manifest your desired result!

I am yours for the victory of your soul recast in a new image of you as wholly God!

Advanced Studies of the Human Aura #11

Electromagnetic Faithfields

Gracious Advocates of Faith, Hope and Charity,

Many of you have observed in your lives the positive effects of establishing a field of belief or what I choose to call an electromagnetic faithfield around your being. This blue-fire energy matrix can be a powerful resource in the conduction of holy frequencies of light into your aura and the auras and lives of others in manifesting all manner of divine works of the Spirit. Often, unless there is a specific level of harmonic resonance firmly planted around oneself through the conscious invocation of light, certain higher spiritual works simply cannot come to pass.

Electromagnetic Faithfields

<http://i570.photobucket.com/albums/ss147/Maya57/LIGHT/Dimension.jpg>

The great masters have understood the hows and wherefores of the creation of these energetic faithfields and of their import in all their endeavors, both private and public. Ancient scriptures cite what has been called the building of an altar, and this is a metaphoric representation of the creation of a specific grid of light. Through powerful prayer, chant and song the spiritual adepts were able to establish a platform upon which alchemical works were accomplished that would seem miraculous to most humans.

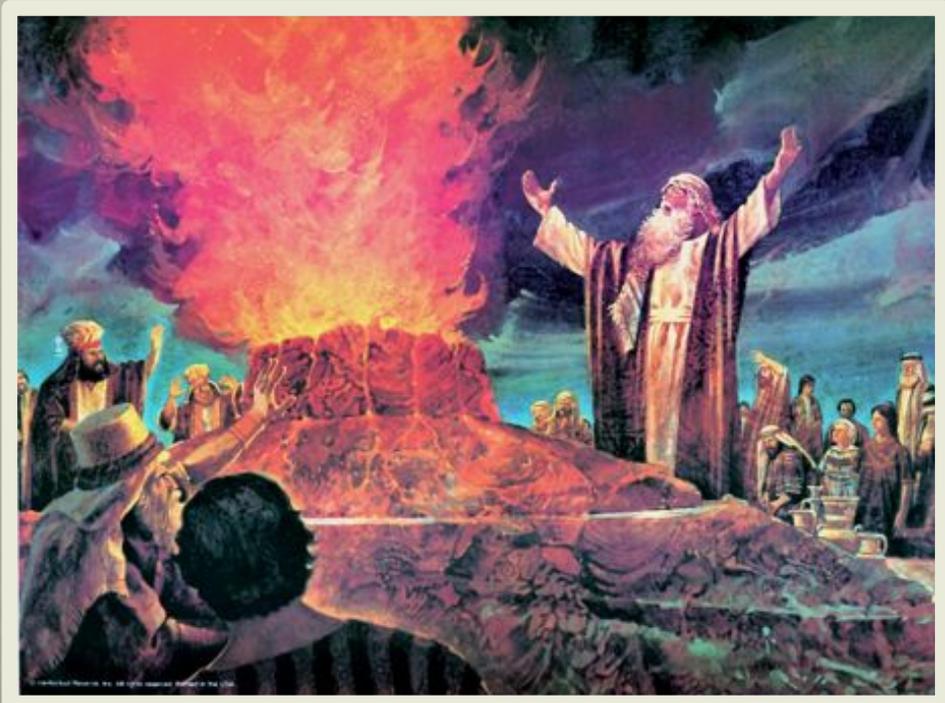

Electromagnetic Faithfields

Continued...

Take for example the story of Elijah and his challenging of the false priests of Baal. (I Kings 18:25) The symbology of earth (rock), water and air (wood) is mentioned within the story as the master proves that the one true God had heard his prayer and would answer by fire. Elijah created an electro-

magnetic faithfield by his connection with his Source and by his righteous use of the laws of metaphysics and divine science.

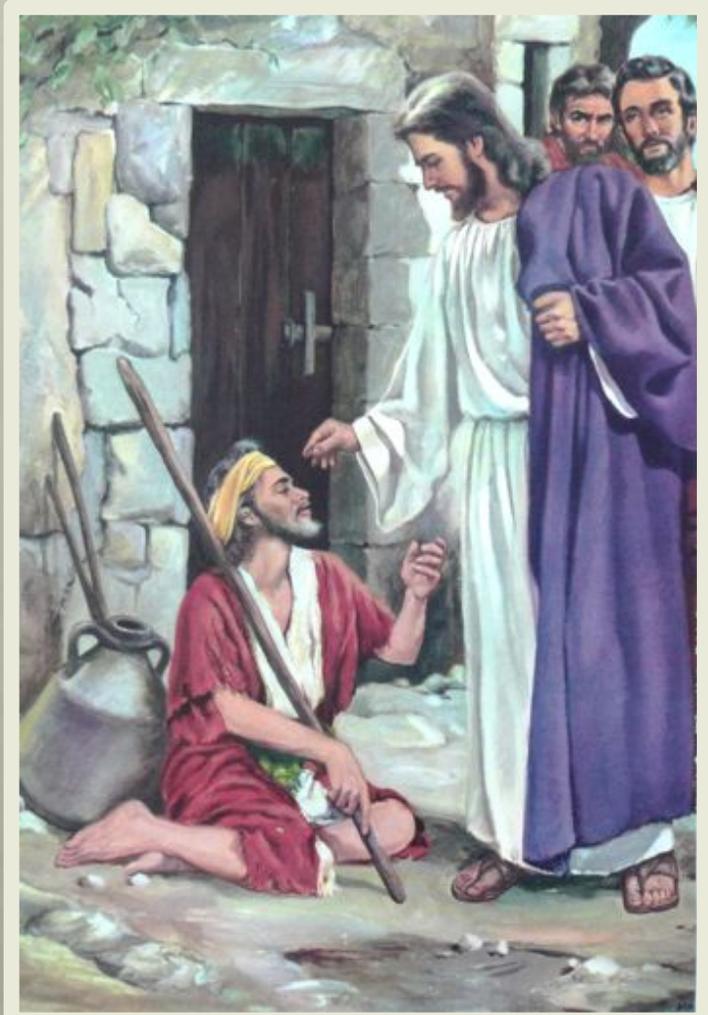

He was able to co-create the alchemical fire that consumed the unreality of the carnal ones.

Electromagnetic Faithfields

Continued...

The Lord Jesus often healed with the words, “Your faith has made you whole.” (Mark 5:34; Luke 17:19, 18:42) He knew that only when individuals had first accepted the possibility and then the reality that God, through him (Jesus), could bring perfect wholeness unto them, would their healing occur. He reestablished the sacred connection between the soul and the spirit of each devotee by providing the resource of light of his own being as the Christos in embodiment.

Electromagnetic Faithfields

Continued...

Those who believe in their own wholeness and imminent healing accelerate the process. Those who accept that Spirit can move through the matter planes, charging and recharging them with its light essences, are more apt to experience the miraculous. Likewise, those who deny

God's existence or the workings of Spirit cannot create or sustain the required auric field through which the heaven world can pour forth its blessings and graces.

Electromagnetic Faithfields

http://i262.photobucket.com/albums/ii96/Narhaniel/111%20Nathanael%205D/Natanael_SeraphSoul144.jpg

Although electromagnetic faithfields cannot be perceived with the naked eye through dual-eyed vision, they exist nonetheless. The greatest healers have been able to feel the power of the Holy Spirit's movement through any medium when the reality of faith in a higher power has provided the access point for its energy to emerge.

Electromagnetic Faithfields

Continued...

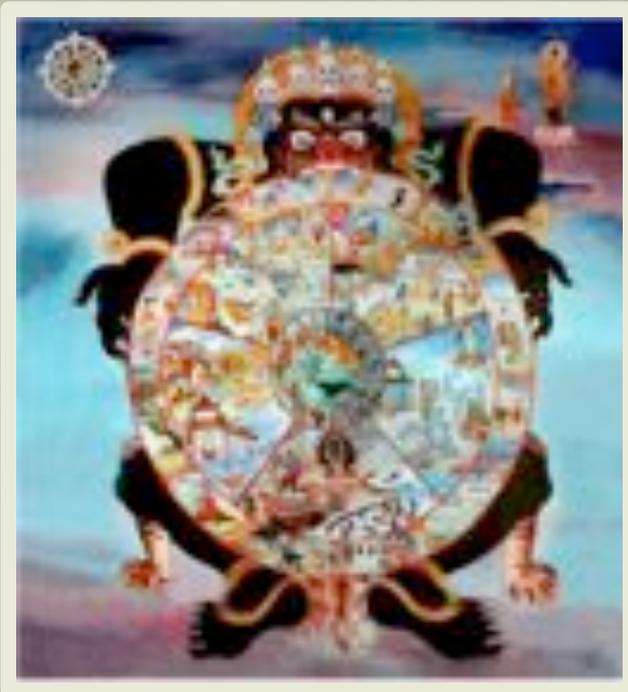

Through a sacred process of sublimation that occurs through surrender to the divine will, wisdom and love a holy vacuum is created that is a super concentration of Spirit within matter. As the “I, the nothing, Thou, the All” mantra is spoken, the omnipresent omnipotence of the Omniscient One is activated within the virgin space of beingness surrounding the devotee, and all things become possible for God in that moment within his or her life.

http://i262.photobucket.com/albums/ii96/Narhaniei/12_12_key_by_Nathanael.jpg

Electromagnetic Faithfields

Continued...

Every seemingly miraculous event or manifestation has occurred because a portal between the divine and the human, betwixt heaven and earth was created by someone's strong faith and belief in the Spirit. Where faith has been demonstrated yet instantaneous healing has not manifested, the wisdom of cosmic law mandated that additional lessons were required to be learned or karmic recompense to be more fully paid. Even the Lord Jesus could not heal in certain regions because of the unbelief of people abiding there.

Electromagnetic Faithfields

Spirit is electromagnetic when contacting the auric fields of sentient life. It is the divine pulsation of God that exists everywhere and that draws all that is divine within the creation to itself by the law of attraction. When the men and women of today understand that their primary essence is Spirit and when they manifest mastery through utilizing its harmonious waves of peace to restore all to its natural state of balance and integrity, they will be able to perform all alchemical feats with great ease and joy because they will be living fully within the Eternal's supreme faithfield of love-wisdom.

Electromagnetic Faithfields

Continued...

Jesus said, “And I, if I be lifted up from the earth, will draw men unto me.” (John 12:32) He understood the electromagnetism of the Spirit as it was manifest through his being as God’s divine Son and lodestone.

He had used the Philosopher’s Stone of divine alchemy and truth by the wisdom of his Father to those who would hear him.

Electromagnetic Faithfields

Continued...

Electromagnetic faithfields may be increased by a kinetic factor that is the square of the sum of the number of those who are outpouring their devotions together in any joyful and intentional service to the light. Although creating a more powerful grid for the conveyance of spiritual energies to bless humanity may increase by geometric proportions by increased numbers, it is also dependent upon the specific frequencies of each member.

http://i219.photobucket.com/albums/cc238/antonywalto/DSC_0015.jpg

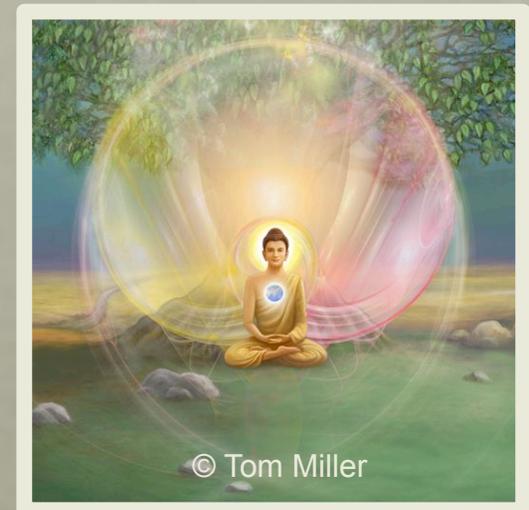

Electromagnetic Faithfields

Continued...

A few adepts or arhats can generate as much spiritual light-energy as hundreds, thousands or even millions of aspirants who have yet to attain their Christhood or Buddhahood. Thus, cosmic faithfields may be established that can sustain the spiritual protection of entire planets by beings like Sanat Kumara or Gautama Buddha who have developed their auric fields over millennia to feed vast evolutions of lifewaves.

May your auras be cleared by your faith to sustain your swift path home to the heart of the One.

Lovingly yours, I am,
