Advanced Studies of the Human Aura #12

Cosmic Fusion and Cosmic Fission

Scientists of the Spirit,

The outplaying of events in the world of form always involves the dynamism of the interaction of polarities. For life's cycles consist of the ongoing expansive thrusts of Alpha-light coupled with the contractive recoils of Omega-darkness. Within this ebb and flow of the tai chi energies of thesis and antithesis a unique synthesis is born that is the love-wisdom child of their flowing relationship.

<http://i296.photobucket.com/albums/mm164/MissComical/Yin-Yang.jpg>

Cosmic Fusion and Cosmic Fission

Continued...

As a fully realized solar being you are the fusion, as a Christic union, of the higher atomic elements of your Father-Mother Creator. Within your Solar Presence the blazing God-attributes of Alpha's transcendent masculine divinity and of Omega's resplendent female corporality exist in their purest manifestation. The stellar auric field of holy light within this domain is more effulgent than the physical light of the sun of your solar system, which is also a cosmic fusion of the alpha-seed of Helios and the omega-egg of Vesta.

http://i157.photobucket.com/albums/t58/crin_album/oneness.jpg

To engage heaven in the higher sciences you must understand your essential nature as a whole being, as a divinity living within the sublimity of time and space. From one perfected whole the Real You divided into two equal but opposite polarities after your original ideation in the Mind of God.

Cosmic Fusion and Cosmic Fission *Continued...*

From MAN, WOMB-MAN or woman emerged to complement and fulfill his beingness within the matter (mother) spheres.

Although you experience the cyclic rounds of existence as two halves, once each of

you has merged with your original Solar Presence, your personal “First Cause,” you will again be one in a new holy union of perfected beingness.

Cosmic Fusion and Cosmic Fission *Continued...*

The auric fields of each soul of twin rays are mirror-images of each other. Those whose inner vision is open and clear can identify the complementary aspects of individuality that each soul expresses because the patterns are identical, though in polarity.

Cosmic Fusion and Cosmic Fission

Continued...

Some of you have had experiences or dreams when your “other self” appeared to you, often being your own reflective self in reverse. Occasionally when you have traded observations about your evolutionary path, you have noticed how they have been very similar, though experienced within a different series of male or female forms. Your vision, your outlook and your paradigms may be diametrically opposite from one vantage point, yet taken as a whole they fill up the tai chi circle completely.

<http://i1006.photobucket.com/albums/af184/zerbica/Reflection.jpg>

Cosmic Fusion and Cosmic Fission

Continued...

To fully harness the light of your collective Solar Presence there must be a higher fusion of the glorified aspects of Selfhood of you and your twin ray. This may be experienced through the blending of the resources of your hearts and minds through the alchemy of true love—love of God within each other. When this union occurs, higher heart-

mindfulness or cosmic love-wisdom as Buddhic beingness is given birth within your collective consciousness. This ideal realized causes a cosmic explosion of light where a new star of divinity from your union is born.

http://i195.photobucket.com/albums/z15/wop_salad/ying_yang.jpg

Cosmic Fusion and Cosmic Fission *Continued...*

The solution to the age-old question, “Which came first, the chicken or the egg?” may be discerned when you understand that there must be the One before two can emerge. Eventually the two merge as one into the One again! Within the chicken the egg already exists in potential!

Cosmic Fusion and Cosmic Fission *Continued...*

<http://i255.photobucket.com/albums/hh131/nepaljapan/UNUSED/-Thanka/TATA18.jpg>

At the beginning of the manvantaric cycle of the great outbreath, fission occurs. At the ending of the manvantaric cycle of the great inbreath, fusion occurs. To some it is difficult to discern any difference within these sacred processes except through a cosmic microscope! Within the All-Seeing Eye of unity, dual-eyed vision merges into singular, perfect vision.

Cosmic Fusion and Cosmic Fission *Continued...*

All banality of the human experience of life outside the circle of perfect oneness in God will one day give way to a supernal experience of divine authenticity as you fuse your heart and mind with the One and enter the center of the tai chi experience of peace.

Advanced Studies of the Human Aura #13

Magnetism and Mesmerism, Attraction and Repulsion

Radiant Spirits,

Few individuals consider the effects of the emanations of their auras upon the greater macrocosmic worlds. Just as there are ongoing studies of the movement and influence of the heavenly bodies upon the psyche of Man in astrological discourses, so I suggest commencing a detailed study of the effects of the movement and influences of the auras of mankind upon the planetary home upon which they abide as well as upon other spheres and solar orbs.

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

Much is touted in this day and age about the deleterious effects of mankind's ignoble activities upon his physical environment.

I can assure you that although his unconscious and erroneous ways have been truly disastrous in many circles, there is an even greater threat to his world manifest through his consciousness and the energetic emissions that flow from his auric field.

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

http://i217.photobucket.com/albums/cc1/astralgirly/Oneness/127962858_5_i1lc.jpg

As I have explained, spiritual devotees may create powerful electromagnetic faithfields through their collective prayerful efforts. By drawing forth a spiritual wave of light-energy from your Source and consecrating it for God-good in your domain, you put a positive and magnetic spin on your auric field and all life with whom you interact. By maintaining a humble

mien toward the Creator and realizing that the Divine One is the active principle in all sacred healing work, amazing and beneficent results may ensue.

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

Franz Anton Mesmer engaged in healing experiments using what he termed *animal magnetism*. Although his efforts were not fully understood by his peers and some of his conclusions were based on his own limited human perceptions, he rightly intuited that a universal energy source that he termed “magnetic virtue” may be “accumulated, concentrated and transported” for healing and for other purposes. Likewise, his statement that “it (this virtue) is communicated, propagated and increased by sound” is accurate. Many of his other *27 Propositions* are based on true, esoteric science, though expressed through the lens and vocabulary of 18th century science.

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

The greatest
“attractor”
that may be
employed
for all
spiritual
and
scientific
work
is the
cosmic
dynamo of
your Solar
Presence.

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

A silhouette of a person sitting in a meditative pose on a large rock. The background is a sunset or sunrise over water, with a large, bright sun low on the horizon. The sky is a mix of purple and blue.

When focused through the prism of your Christic Self, all divine virtues may be yours to draw forth and re-qualify with your own individualized energy field of beingness. When you engage in this alchemical science by activating and actualizing the holy quintessences of solar light

**through your heart,
victory in all endeavors
shall truly be yours.**

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

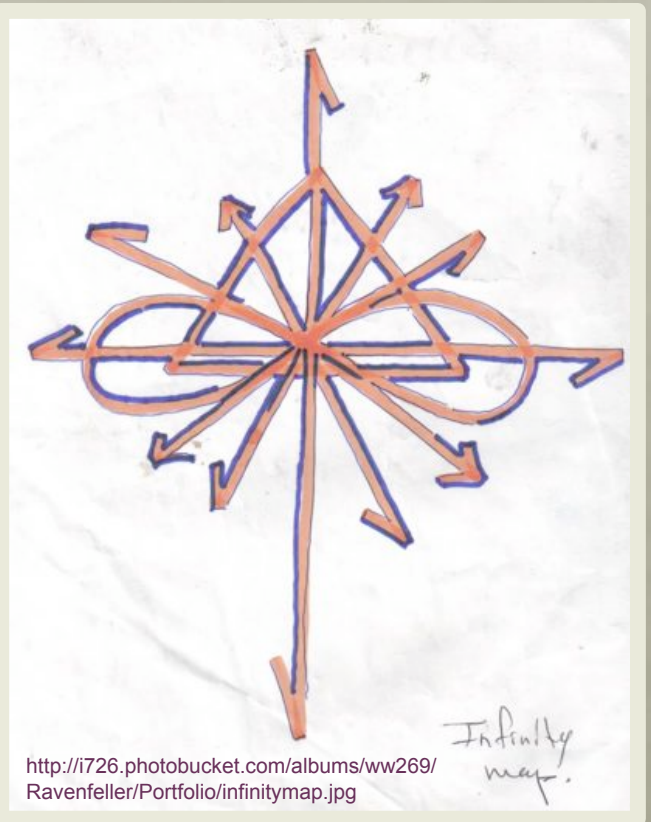

As you know certain metals and other substances may become magnetized by direct and constant friction or contact with a magnet or magnetic field. Likewise, as you align your heart and mind with the polestar of God's supernal heart-mind field, you may receive the cosmic pulsations from his divine lodestone.

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

Plugging into God allows the figure-eight light circuit of your relationship to be completed. This is when your Maker's holy current, with a brilliant wattage and life-giving amperage, may shine forth through your entire being.

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

A strong flowfield and a glowing aura naturally repel the untoward advances of the dark ones to snuff out your emerging Christhood, your budding Buddhahood, your nurturing Motherhood. Though some life-streams may be attracted to you in order to feed off your light, your heightened sensitivity to their auric patterns and inner motives will give you the discernment as to when to safeguard your auric light or retreat to regenerate its effulgence through a time of silent meditation upon and devotion to **your God Self.**

http://img.photobucket.com/albums/v135/pat_ohanlon/Fractal%20Meditation%20Art/sHeart1bluebackcopy.jpg

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

Mesmer's first proposition states, "A responsive influence exists between the heavenly bodies, the earth, and animated bodies." Man, through free will, may accentuate and expand the life-giving and light-emanating qualities of his Higher Self through conscious and directed discourse with the sun and the stars! The astrology of my holy brethren, the ascended magi, is now concerned with our role in propagating cosmic emanations and influences that bless life upon all planetary spheres and solar worlds!

Magnetism and Mesmerism, Attraction and Repulsion *Continued...*

Master the quasi-magnetic influences of your lower nature
while embracing the superconductor of your True Self!
In this endeavor

I will be
the One
in your midst!

Imaginatively,
I am your elder brother,

El Morya
