# Beekeeping and Solar Genetics

Robert Beese, MS  
Sunday, May 21, 2017

# Syllabus and Objectives

- My adventures working with the bees
- How bees are really the ones keeping us by pollinating our food.
- How bees are agents of the sun as step-down transformers
- How genetic expression in the hive is determined by the nurturing of the larvae
- How the beehive is actually a super-organism with intelligence greatly exceeding that of the individual bee

# Quiz

Q: What has four wings, five eyes and six legs?

(Hint: Listen to audio)

Here is the Hero of this show

# Anthony Williams on Honey

## How long have bees been around?

Bees nearly identical to those living today have been found in amber dating back 65 million years, corresponding to the time of the emergence of flowering plants.

Example of a perfect genetic design, evidence of divine origin.

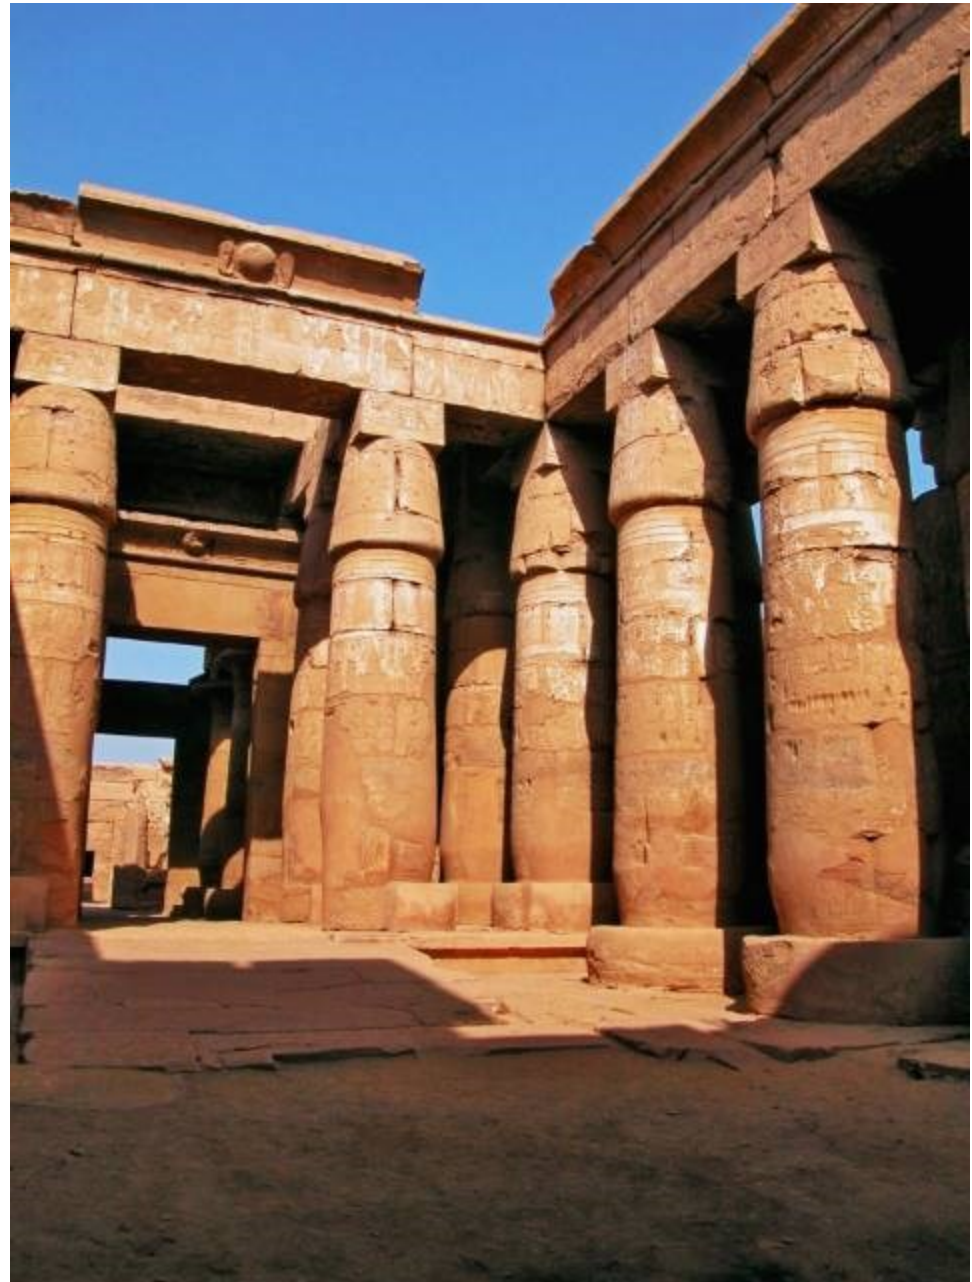

According to esoteric tradition we have been told that the bees came from Venus with Sanat Kumara as part of the rescue mission for Earth.

## Bees bring us a surprise

# Sweet Miriam

# Omraam

“The sun commands everything in the universe. He is like the conductor of an orchestra or a king on his throne. When he decides something he only has to give the signal and all the spirits he has sent to earth or to the other planets hasten to carry out his wishes. They modify something in the atmosphere or in the electromagnetic currents and all kinds of changes take place in the vegetable animal and human kingdoms, in the biological, psychological, economic, and social spheres. Everything that happens on the Earth is commanded by the sun.”

*Toward a Solar Civilisation p 20*

## Omraam, cont'd

So you see the earth's etheric body fuses into the sun's, for the Sun also has an etheric body which reaches far beyond his own sphere, to the earth and beyond to all the other planets. And that is how the sun and the earth can actually touch each other. They are already fused together."

*Toward a Solar  
Civilisation p 32*

# El Morya

## Advanced Studies of the Human Aura

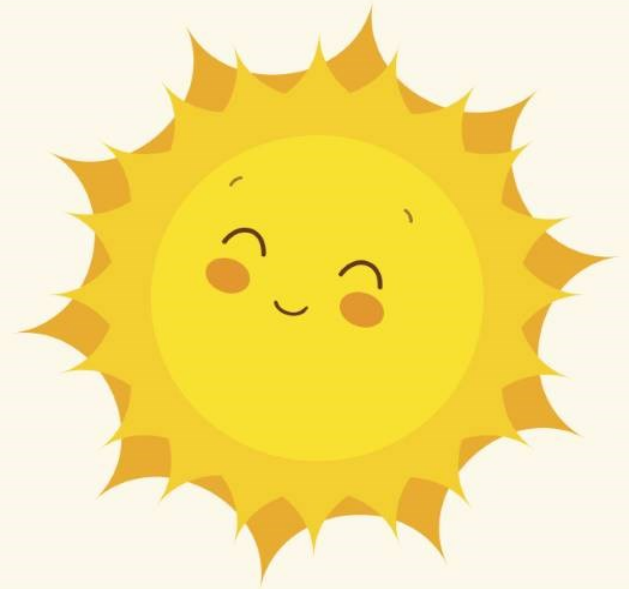

The original creation was the mindful thought of the Creator, and all the subsequent thoughts or ideations of created beings are reflections of this First Cause, or causal thought process of God. Thought is a ray of divine intelligence focused on a specific purpose. Once it is released from the mind of its creator, it is fulfilled and manifest according to the intensity (power and love geometrized) of its conception.

The entire warp and woof of creation is God's endowment of himself to his offspring.

p 5 & 6

## Solaria

For the stream of our awareness, our love and our radiance is always available, day and night, night and day. And though the Sun may be on the other side of the Earth in terms of the rays directly impacting you during the nighttime of your twenty-four hour cycles, the rays of the Sun actually penetrate through the Earth to reach you in a harmonic state of quiescent love and light as you rest, regenerate and are blessed by these subtle currents. Therefore, you see, the Sun is always invested in the health of the Earth and all evolutions living hereon. The Sun is invested in your true spiritual well-being, the well-being of your souls and spirits, the well-being of your minds, hearts and temples of light.

# DNA

Building blocks of life

- Every cell exactly the same
- Cell walls exactly .07 mm thick
- Cells slope 108 degrees

# A Team Effort

- A large group of bees work together as a team
- Bees work in harmony and perfect order
- Bees start from different points and the comb cells meet perfectly
- There are no errors!

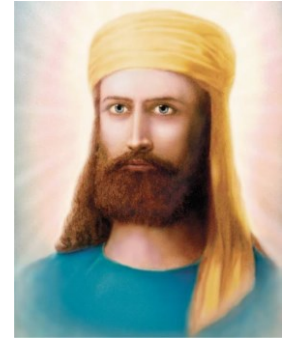

# Meditation

# BZ Video of Hive

# Z-Ray

Quote from El Morya

**Z-Ray:** “The Z-ray anchors a high frequency of light as the zenith of all audible sound rays. It is the culmination of all of the letters of the English alphabet, A-Z, and includes within its humming tonal sound the individual vibrations of all the letters. The Z-ray is a concentrated spiritual quintessence that synthesizes sound vibrations into sub-light or pre-photon energy. Within the higher evolutions of the elemental kingdom, honey bees anchor the Z-ray from Venus, their home star, to the Earth and its atmosphere. Their great ingenuity in pollinating flowering plants while also creating perfect geometric honeycombs is proof of their sacred work on behalf of all elemental life, whom they serve most nobly. Honey, pollen and royal jelly are concentrated forms of a divine ambrosia or love-wisdom elixir offered by plants to mankind. These contain a high solar light content and are thus most beneficial for our health and longevity.”

*(El Morya, June 15, 2009.)*

## **The Song of the Sun:**

### **Merge with the Celestial Stream of Helios and Vesta**

Dearest Hearts,

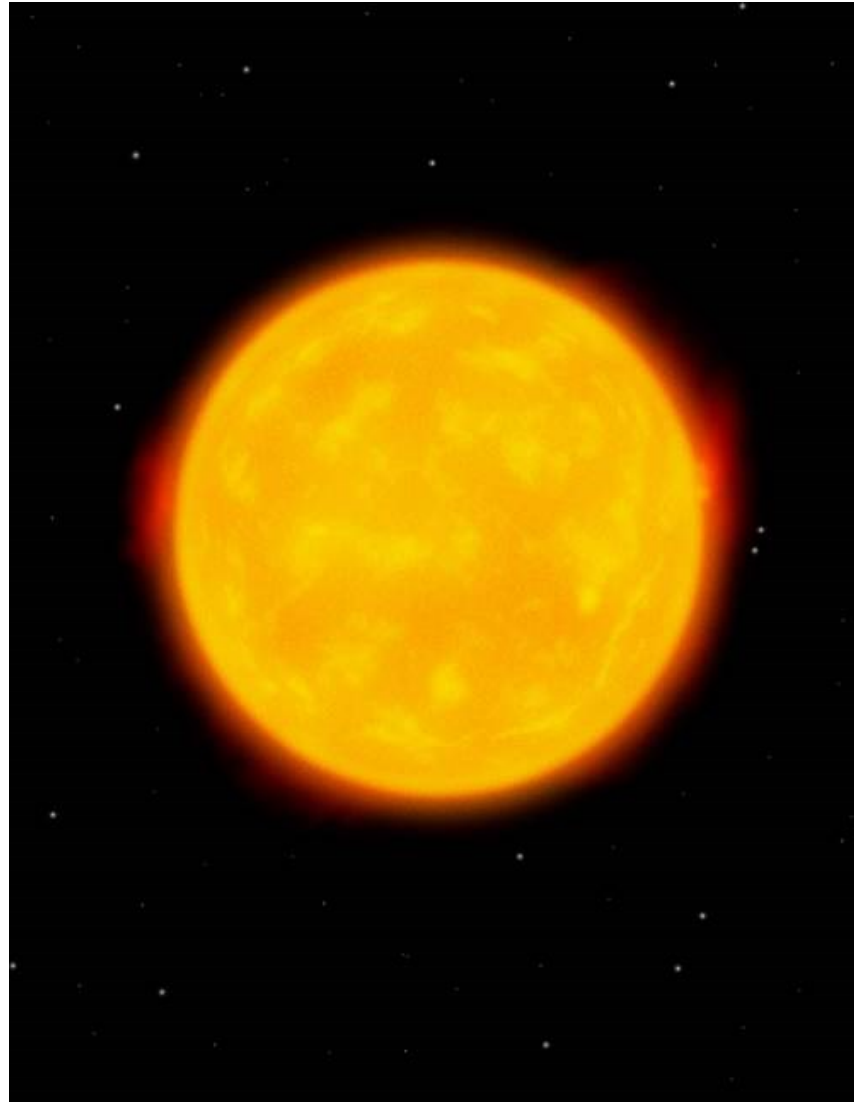

As I continue to discourse with you on the science of sound, I reveal this day a mystery. The primal sound of the solar system in which we live and move and have our being is the song of the Sun. This sacred music is the emanation through the light and sound ray of the very Presence of Helios and Vesta, the essence of who they are streaming forth constantly as a beautiful divine aria, truly the very voice of our Godparents.

Listen with me now, blessed hearts, to this sacred song that may be heard by your soul at inner levels. It is the music of the spheres that sustains life, your life, the life of every soul evolving upon all planets within this solar family. It is the sounding of the perfect sound of life itself in its original manifestation of God-goodness, of blessedness, of pure light-radiance.

# Insights, Questions, Comments

Let's put on the hat of a beekeeper

# Hive is a living super-organism

# Hives can get Fancy

# Queen Bee

# Drone

# Worker Bees

- Much larger than workers
- Lifespan up to 5 years
- Fertile (up to 2000 eggs per day)
- Special behaviors
- Determines gender of eggs

Queen

# Can you find Her Majesty?

# Queen Cells

# Epigenetics

The study of changes in organisms caused by modification of gene expression rather than an alternation of the genetic code itself.

“Epigenetics has transformed the way we think about genomes.”
